

Emily Antes, Au.D.

eea29@pitt.edu | (914) 815-6089

EDUCATION

University of Pittsburgh, School of Health and Rehabilitation Sciences

Doctor of Philosophy (Ph.D.)

Expected: 2030

Doctor of Audiology (Au.D.) | GPA: 3.96/4.00

2025

Master of Arts (M.A.) in Audiology | GPA: 3.96/4.00

2023

Purdue University, College of Health and Human Sciences

Honors College, *Graduated with Distinction*

Bachelor of Science (B.S.) in Speech, Language, and Hearing Sciences | GPA: 3.92/4.00

2021

RESEARCH EXPERIENCE

Graduate Student Researcher, University of Pittsburgh

2026 – Present

Principle Investigator: Hari Bharadwaj, Ph.D.

Characterizing differences in cochlear tonotopic coding and speech-in-noise perception between individuals with noise-induced hearing loss and chemotherapy-induced hearing loss, determining how etiology-related differences in cochlear coding are reflected in neural coding of speech, and developing profiles of suprathreshold deficits to predict hearing aid benefit and inform candidacy for targeted interventions.

Research Audiologist, University of Connecticut

2025 – 2026

Principle Investigator: Akshay Maggu, Ph.D.

Led three projects: (1) A clinical trial assessing the efficacy of a game-based auditory training platform for children with auditory processing disorder (APD). Clinical trial APD test battery includes BKB-SIN, Pediatric AzBio, Masking Level Difference, Gaps-in-Noise, Duration Pattern, Dichotic Digits Test, Auditory Processing Disorder Questionnaire (APDQ), Children's Auditory Performance Scale (CHAPS) questionnaire, and TONI IV (Test of Nonverbal Intelligence, Fourth Edition). Performance is compared between our game-based auditory training and a non-gamified training. (2) An online survey study investigating the experiences, attitudes, and knowledge of APD among U.S.-based hearing health professionals. Statistical analyses using R. (3) Investigation of the impact of providing amplification for older adults with hearing loss during auditory processing tests which primarily rely on normal hearing function. Central auditory processing performance is compared between older adults with hearing loss versus those with normal hearing.

Audiology Fellow Researcher (Externship), Stanford University

2024 – 2025

Principle Investigator: Matthew Fitzgerald, Ph.D.

Analyzed the influence of tinnitus on clinical measures of speech perception in quiet and in noise as the lead investigator. This study was a retrospective analysis over 10,000 patients evaluated at our medical facility with pure-tone audiometry, monaural QuickSIN, and monaural word-recognition testing (NU-6). Performance was compared between individuals with and without tinnitus, classified by ICD-9 and ICD-10 codes for tinnitus. Contributed to two additional projects on repeatability of clinical speech recognition measures in quiet and noise and hearing aid adoption, usage, and retention.

Graduate Student Researcher, University of Pittsburgh

2022 – 2024

Principle Investigator: Hari Bharadwaj, Ph.D.

Investigated the role of the dorsal cochlear nucleus in the generation of tinnitus in normal-hearing individuals as the lead investigator. Human participant performance was measured in a range of web-based spectral and temporal processing tasks to identify perceptual deficits that co-occur with tinnitus and identify the locus of

altered function in the central auditory system. Additionally contributed to a project on biomarker profiles of cochlear injury in tinnitus.

Undergraduate Research Assistant, Purdue University

2020 – 2021

Principle Investigator: Alexander Francis, Ph.D.

Assisted with piloting a two-part study investigating the effects of noise level on autonomic arousal and listening fatigue on fall risk.

TEACHING EXPERIENCES

Guest Lecturer		
<i>Doctor of Audiology Program, University of Connecticut</i>		
SLHS 5372: Central Auditory Disorders		April 2026
Central Auditory Evoked Potentials Lab		February 2026
Auditory Processing Disorder Lab		
Undergraduate Teaching Assistant		
<i>Purdue ASL/Deaf Studies Program, Purdue University</i>		
ASL 20100: American Sign Language III		Spring 2020, Fall 2020
ASL 10100: American Sign Language I		Fall 2019

AWARDS, HONORS, and SCHOLARSHIPS

Student Research Forum, <i>American Academy of Audiology</i>	November 2024
Audiology/Hearing Science Research Travel Award (ARTA), <i>ASHA</i>	July 2024
Graduate Student Travel Award, <i>Association for Research in Otolaryngology</i>	December 2023
Dean's List, <i>Purdue University</i>	All Semesters (Fall 2017 – Spring 2021)
Semester Honors, <i>Purdue University</i>	All Semesters (Fall 2017 – Spring 2021)
Presidential Scholarship, <i>Purdue University</i>	All Semesters (Fall 2017 – Spring 2021)

WORK EXPERIENCE

University of Pittsburgh Medical Center (UPMC), Pittsburgh, PA		
<i>Clinical Audiologist, Casual</i>		July 2026 – Present
Perform diagnostic hearing and vestibular evaluations across multiple UPMC sites.		
Department of Speech, Language, and Hearing Sciences, University of Connecticut		
<i>Research Audiologist</i>		July 2025 – July 2026
- Led two projects related to Auditory Processing Disorder (clinical trial and online survey study). - Directly involved with data collection, data analyses, dissemination of results via conferences and manuscript writing, development of IRB protocols, and general lab management. - Supervised undergraduate and graduate lab members.		
Department of Communication Sciences and Disorders, University of Pittsburgh		
<i>Graduate Student Researcher</i>		Fall 2023 – Spring 2024
Duties involved protocol writing, in-person human subject testing (audiometry, EEG, OAE, tympanometry, ART, and ABR), data analysis, and manuscript writing.		

- Leadership Education in Neurodevelopmental and Related Disabilities (LEND)**, University of Pittsburgh/UPMC
LEND Pediatric Audiology Trainee *Fall 2022 – Spring 2023*
- Assisted families of students with disabilities with managing medical appointments.
 - Observed D/HH children in the classroom and in appointments with other professionals such as SLPs.
 - Contributed to continuing education efforts for local to national audiology communities (e.g., AAA, ASHA).

PROFESSIONAL ACTIVITIES AND LEADERSHIP POSITIONS

- TRANSLATES**, University of Pittsburgh *June 2025 – Present*
Advisory Panel Member
(TRANSLATES: TRanslational Auditory NeuroScience: LAb-based Training for Empowered Self-efficacy)
- Provide feedback and solve roadblocks to students meeting the program competencies, the administrative support personnel for budgeting purposes, and the program faculty to ensure the experience is beneficial.

- Student Academy of Audiology (SAA)**, University of Pittsburgh *May 2023 – May 2024*
President
- Oversaw the Student Academy of Audiology Board at the University of Pittsburgh.
 - Represented the organization at National American Academy of Audiology and Pitt SHRS events.

- President-Elect* *May 2022 – May 2023*
- Attended national SAA meetings, University of Pittsburgh SAA meetings, and SAA advisor meetings.
 - Supported other SAA chair members in their roles.

- First Year Representative* *September 2021 – May 2022*
- Participated in SAA executive board meetings to make decisions regarding the club and events.
 - Led events including a mentoring program for undergraduate students interested in pursuing an Au.D.

- Student Academy of Audiology (SAA)**, Purdue University *September 2019 – May 2021*
Member
- Furthered my learning on the topic and practice of Audiology.
 - Practiced/observed different techniques, tests, and equipment in the MD Steer Audiology Clinic.

PROFESSIONAL MEMBERSHIPS

- National Student Speech Language Hearing Association *May 2026 – Present*
Student Member, National Student Academy of Audiology *January 2022 – May 2025*
Student Member, Association for Research in Otolaryngology *November 2023 – November 2024*

SERVICE TO THE FIELD

- Journal Manuscript Reviewing** *June 2026, September 2026*
Ad Hoc Reviewer, American Journal of Audiology
